# OJO ADESHOLA OLAJUMOKE

## Frontend Developer

ofavourmi55@gmail.com · +234 805 498 6700 · adeshola-ojo.vercel.app · github.com/missfavis-coder · Nigeria( Remote)

## SUMMARY

Frontend developer experienced in building modern, production-ready web applications with React, Next.js, TypeScript, and Tailwind CSS. I specialize in translating product requirements and designs into responsive, reusable interfaces while integrating complex APIs and application workflows. I also have a strong understanding of system design, application architecture, API communication, and frontend state management, allowing me to work effectively across the stack.

## SKILLS

**Languages:** TypeScript, JavaScript

**Frontend:** React, Next.js, Tailwind CSS, Framer Motion, Responsive Design

**State & Data:** TanStack Query, Zustand, React Hook Form, Zod

**Backend & APIs:** REST APIs, Node.js, Express.js, Supabase, API Integration

**Databases:** PostgreSQL, MongoDB

**Architecture:** System Design, Application Architecture, API Design, State Management

**Tools:** Git, GitHub, Docker, Playwright, React Flow, Figma

## EXPERIENCE

**Tekcify — Frontend Developer** · Nigeria
*Remote · 2025 – Present*

- Started as a Frontend Intern and continued as a volunteer part-time Frontend Developer based on contributions to the team.
- Built and maintained production dashboard interfaces using **React, Next.js, TypeScript, and Tailwind CSS**.
- Integrated **payment APIs and other backend APIs** across the Binx website and GetSkillMD, connecting frontend interfaces to application services and workflows.
- Redesigned and improved the **GetSkillMD dashboard**, focusing on usability, responsive layouts, and a cleaner user experience.
- Implemented application workflows including **authentication, OTP-based flows, WhatsApp connectivity, usage analytics, notifications, and dashboard functionality**.
- Collaborated through **Git-based development workflows, pull requests, and code reviews** while contributing to ongoing product development.

**Frontend Developer — Contract / Freelance**
*Remote · January 2026 – March 2026*

- Built and shipped responsive web applications using **React, Next.js, TypeScript, and Tailwind CSS** across freelance projects.
- Worked closely with the backend developer on **Tutoria-Hub** to build a real-life problem-solving platform, integrating frontend interfaces with backend services and APIs.
- Integrated **third-party and internal APIs**, handling data fetching, application workflows, and frontend-to-backend communication.
- Translated product requirements and designs into **reusable, production-ready components** and responsive interfaces.
- Contributed to **application architecture, state management, API integration, and performance optimization** across client projects.

## SELECTED PROJECTS

**getskillmd — AI Developer Platform**
Led frontend development of an AI developer platform, building generation workflows, dashboards, billing, authentication, and API-driven experiences.

**Scrapify — Workflow Automation Platform**
Built the frontend for a natural-language workflow automation platform with dashboards, workflow visualization, execution monitoring, schedules, and issue handling.

**Binx — SaaS Platform**
Built dashboard features and integrated backend APIs for WhatsApp connectivity, OTP flows, analytics, notifications, and application data.

**Tappay — Payment Platform**
Led frontend development of an NFC, QR, username, and phone payment platform, integrating payment APIs and transaction flows. **1st Place — Tappay Hackathon.**

**Onliftoff — Web Application**
Built a responsive web application with reusable components, interactive flows, API integrations, and maintainable frontend architecture.

## EDUCATION

### Obafemi Awolowo University

B.Sc. Computer Engineering — Expected 2028

## AWARDS

- **1st Place — Tappay Hackathon, Redeemer's University**
